

Martin Sevov

CURRICULUM VITAE

IT Administration & Automation | MSc Student in Cybersecurity & Resilience | BSc Applied Informatics & Data Science

ms.sevov@gmail.com · [GitHub: mssevov18](https://github.com/mssevov18) · [LinkedIn: martin-sevov](https://www.linkedin.com/in/martin-sevov)

PROFILE

Bachelor of Science in Engineering (BSc) graduate in Applied Informatics and Data Science from IMC Krems with experience in research data automation, IT administration, process automation, and software prototyping. Skilled in Python, C++, C#/.NET, databases, Linux, Docker, and automation tools including Power Automate and Power Apps. Experienced in turning technical requirements into working prototypes across research, education, and enterprise IT environments.

WORK EXPERIENCE

IT & System Administrator Intern – Concircle

Jul 2025 - Jan 2026

Wien, Austria · Full-time

- Worked on established and new Power Automate workflows for internal process automation.
- Upgraded an existing SharePoint-based CRM with a Power Apps offer-approval workflow.
- Assisted the IT administration team with research, support, and low-complexity implementation tasks.
- Practiced virtualisation server management using vSphere and Proxmox.

Research Assistant – University of Applied Sciences IMC Krems, DigiCare4CE

Sep 2024 - Aug 2025

Krems an der Donau, Austria · Part-time

- Prepared and processed survey data for the DigiCare4CE research project.
- Created automation scripts to streamline data preparation, analysis, and formatting of findings.
- Established a data automation pipeline to support analysis and insight generation.
- Published a 3D visualisation website with self-made 3D models and analysis artifacts.

Programming Teacher – Vocational High School for Computer Programming and Innovation

Jul 2022 - Aug 2022

Burgas, Bulgaria

- Taught programming to children aged 7 to 16 using Scratch.
- Led groups of up to 16 students using a self-made teaching syllabus.

Student Internship Project – Musala Soft & VSCPI

Feb 2022 - Jun 2022

Burgas, Bulgaria

- Developed a C# MVC banking service with multiple clients, a central server, and a database.
- Worked through multiple iterations following Agile methodology.
- Debugged TCP traffic using Wireshark.
- Applied unit testing and the repository pattern.

Student Internship Project – Technologica & VSCPI

Jul 2021

Burgas, Bulgaria

- Created an Angular weather widget that presents scraped data from official sources.

EDUCATION

MSc in Cybersecurity and Resilience – University of Applied Sciences St. Pölten

Sep 2026 - Jul 2028 (ongoing)

St. Pölten, Austria

BSc Eng. in Informatics and Data Science – University of Applied Sciences IMC Krems

Sep 2023 - Jul 2026

Krems an der Donau, Austria

- Statistics with R and Python
- Computer networks and distributed systems
- Databases and relational algebra
- Formal logic and automata theory
- Software engineering and organisational methodologies
- Agile and SCRUM Methodologies
- Multi-OMICS analysis and visualisation
- Small-scale classification models

Vocational secondary education in computer programming – Vocational High School for Computer Programming and Innovation (ПГКПИ Бургас)

Sep 2018 - Jun 2023

Burgas, Bulgaria

Graduated with honors, 5.88 / 6

TECHNICAL SKILLS

Programming

Python (6 years), C++ (4 years), C# .NET (3 years), JavaScript (2 years), Rust (1 year), Embedded C (1 year), HTML & CSS

Systems & Automation

Linux, Docker, CI/CD, Power Automate, Power Apps, SharePoint, Active Multi-OS home lab

Design & 3D

Photoshop, Krita, Blender, SolidWorks, FreeCAD

Data & Databases

R, SQLite, MsSQL, Relational algebra, Data visualisation, Small-scale classification models, Multi-OMICS analysis and visualisation

Software Engineering

Agile, SCRUM, REST, Test-driven development, Unit testing, Git

Languages

Bulgarian (Native), English (CAE C1, certified), German (A2, studying)

Frameworks & Platforms

FastAPI, Django, Flask, pandas, NumPy, .NET MAUI, WPF, Entity Framework Core, vSphere, Proxmox, SAP ecosystem

SELECTED PROJECTS

Octolab (Self-hosted home lab)

Multi-machine home lab used for experimentation with Linux systems, user services, networking, containerised services, automation, and infrastructure management. DNS, Reverse Proxy, Monitoring and Cloud Storage as core services.

WebAssembly Build Server (IMC Krems thesis / Concircle prototype)

Build-server prototype related to thesis work at IMC Krems and internal prototyping at Concircle.

bookmarker (Rust-based Shell bookmarker)

Rust based bookmarking utility for faster terminal movement.

C# Banking System (VSCPI thesis / student internship)

C# MVC banking service with multiple clients, a central server, and a database, developed through Agile iterations.

Python Dataframe Navigator

Python tool for navigating and working with dataframe-based data.

EVENTS & AWARDS

ÖBB Hackathon — 1st place

Created a prototype using company-provided resources and endpoints.

2024

XTMY Annual Conference and Project Presentation — 1st place

Presented a smart-home system with fast reconfiguration and user authorisation at a university fair in front of a committee.

2023

Adobe World Championship

2022

CERTIFICATIONS

Cisco: IT Essentials

Cambridge English: C1 Advanced (2022)

Microsoft Technology Associate: Python, HTML & CSS, Databases, Excel, Word

Microsoft Certified Fundamentals: Azure Fundamentals

Adobe: Professional Visual Design, Photoshop, Illustrator
